INSTALLATION INSTRUCTIONS

1 There are 2 ways to attach the collar to the pole

i) Attach a B-Tech mounting plate or AV accessory (not supplied) to the front half of collar (Part 1)* by using the M8 x 12mm screws (Part 4) and spring washers (Part 5) then slide the assembled collars onto the $\varnothing 50\text{mm}$ pole (not supplied).

ii) Retro fitting the collar onto the pole - For situations where you cannot hook the collar over the pole. Disassemble the collars by undoing the M6 x 20mm screws (Part 3) with the Allen key (Part 7). Attach mounting plate to front half of collar (Part 1)*.

Fit the collar halves together onto the $\varnothing 50\text{mm}$ pole by tightening the M6 x 20mm screws (Part 3).

* It is important to fix the mounting plate to the front half of the collar (Part 1) so you have access to the M6 x 20mm screws.

Note: Mounting plates can be attached to the collar after the collar is fixed onto the pole.

2 Position collar on pole and fasten the M6 x 20mm screws (Part 3) tightly ensuring the gap between the collar halves on both sides are equal.

3 Two M8 x 25mm grub screws (part 6) are provided for extra safety. At least one M8 x 25mm grub screw must be set in place before any AV equipment is fitted. The $\varnothing 50\text{mm}$ pole may be drilled through to accommodate these safety grub screws or use the existing holes in the pole. Stop tightening the grub screw once the head of the M8 x 25mm grub screw is flush with the surface of the collar.

To mount back to back screens:

Follow steps 1, 2 and 3. Once the collar is mounted to the pole, add the 2nd mounting plate to the back half of the collar (Part 2).
