The Tracer M45 is its stronger brother, which will satisfy the most c

TRACER VOUGE-3 30000MAH
POWER BANK
music lovers. It comes with 45

watts of power and can play up to 14 hours before it needs recharging. The device has two colour versions.

Full connectivity

All the models have Bluetooth 5.0, which makes them easy to pair with mobile devices.

Universal appearance

The classic design makes the speakers fit various interiors and styles. They can become part of the living room, bedroom, or even your office.

Portability

The speakers have a handy strap for easy transport. It is the perfect solution for anyone who moves often or wants to take the speaker on holidays or business trips.

Solid design

Mechanical sturdiness is among the critical characteristics of portable speakers. This is why the TRACER M45 are a good choice for those who value durability and reliability. Their solid design makes them resistant to shock and minor mechanical damage for a long service life. This makes the TRACER speakers perfect for people who are always on the go or outside and need equipment that can stand up to the challenge.

TWS technology

Each model is TWS compatible for an even better sound experience. With True Wireless Stereo, you can connect several speakers to build one powerful stereo set with Bluetooth and TWS.

Equalizer and FM radio

With the sound equalizer, you can adjust the speaker settings to your preferences. If you're into bass, you can easily boost it, or increase mid-frequencies for clear vocals. Additionally, with the built-in FM radio, you can easily listen to your favourite stations with no external devices. The speaker keeps your favourite music and radio programmes in one place.

Memory card and USB flash drive as sound sources

The speakers can play your favourite music from microSD memory cards and USB flash drives. These sources have multiple advantages, such as offline availability. Whether you're in a car, on a beach, or in a park, you can enjoy your favourite songs with no limits. What is more, memory card and USB flash drive compatibility offer better control over your library. You can easily add and remove music files and create playlists for every mood or occasion.
