- Self-sharpening metal blades

Ultimate precision and control

- Control buttons
- Easy to select and lock in 60 length settings: 0.5 to 42 mm
- Adjustable hair combs for the best clipping results

PHILIPS

Highlights

Control buttons

The intuitive user interface gives you precise feedback on the selected length. Use the buttons to easily select and lock in more than 60 length settings. Quickly browse through lengths or slowly go through each small step of 0.2 mm.

60 lock-in length settings

Use the Control Buttons to precisely select and lock in the length you want, with more than 60 length settings. Use the comb to trim with precisely 0.2 mm increments between 1 and 7 mm, and 1 mm between 7 and 42 mm. Or you can use it without the comb for a close 0.5 mm trim.

3 adjustable hair combs

The clipper comes with 3 adjustable hair combs: from 1 to 7 mm, 7 to 24 mm and 24 to 42 mm. Just attach one of the combs for more than 60 lock-in length settings, with precisely 0.2 mm increments between 1 and 7 mm, and 1 mm between 7 and 42 mm. Or you can use

the clipper without the comb for a close 0.5 mm trim.

Motorised Combs

The motor-powered length setting system easily selects and locks in the preferred length. The motor powers the comb and allows selecting between lengths with a precision of up to 0.2 mm. This innovative technology gives you the security of clipping all the time at the desired length and achieving consistent results time after time.

Auto Turbo

The Auto Turbo feature automatically adapts to thicker hair, giving a little boost of extra power for an effortless cutting motion.

Remembers last length setting

The comb goes back to the last used cutting length setting when the clipper is turned on.

Powerful cordless use

Don't get tangled up in your cordless hair clippers – a 1 hour charge provides up to 120 minutes of powerful clipping time. Or keep it plugged in for uninterrupted trimming.

2-year worldwide guarantee

All of our grooming products are built to last. They come with a 2-year warranty, never need to be oiled and are compatible with any voltage worldwide.

Self-sharpening metal blades

Self-sharpening metal blades for long-lasting sharpness
