Aebi TerraTrac TT211

For mowing work on embankments and steep slopes: that is the terrain on which the Aebi TerraTrac TT211 displays its qualities. The compact and very manoeuvrable implement from the Swiss manufacturer is therefore used in many local authority and motorway service depots. The SIKU vehicle is equipped with a front mower. Thanks to the universal SIKU couplings, trailers and implements from the SIKU agricultural range in scale 1:32 can be attached front and rear. With the new Aebi TerraTrac TT211, SIKU is extending the range of municipal and agricultural special-purpose vehicles, such as the Weidemann Hoftrac (3059) and John Deere Gator (3060).
